Using Selenium WebDriver, please do the following:

- Open https://cz.careers.veeam.com/vacancies and maximize the browser window.
- Then, choose *Research & Development* and *English* from the lists of departments and languages, respectively.
- Please, count the number of jobs found and compare this value with the expected result.

The number of jobs found: ,,13,,

Compare this value with the expected result:

The number is neither small nor many, but there are a lot of jobs under the name of " C# Developer ". There are no other functions such as "FullStack , Front-End ,etc".

Maybe it's better if some offers are added for recent graduates.
